

Queens Way Retaining Walls

We're about to begin terrace planting on the outbound retaining wall of Queens Way.

Urban design planting

Our urban design team has developed a detailed landscaping plan that will involve planting plants in May and June.

Once established, the terrace will feature a year-round flowering display and a three-level design to provide both height above, and draping plants below the terrace.

Types of plants

The terrace planting will include shrubs, plants and climbers.

The medium sized shrubs will include:

- Japanese Jasmine (yellow)
- Plumbago (blue)
- Indian Hawthorn (white)
- Viburnum (pale pink).

The mid-level plants will include:

- Aloes
- Bird of Paradise
- Fortnight Lily.

Draping plants will include:

- Pink Jasmine
- Dusky Coral Pea
- Gum Vine (yellow).

When we're planting

Our team will be planting for one week beginning Monday 31 May 2021.

Works will be taking place at night between 10pm – 5am.

Lane closures

While works are taking place, Queens Way traffic will be reduced to one lane and the Punt Road on-ramp will be closed.

Some plants will need to be stored on site. This will mean one lane on the on-ramp from Punt Road will be closed over the entire week.

Graffiti cleaning

We are currently cleaning graffiti on a two-week basis or as required. We will monitor any re-emergence of graffiti and adjust the cleaning program as required, until the end of June 2021.

We understand and share the community's concern about the appearance of graffiti on the retaining walls on Queens Way.

Our goal is to manage graffiti in the short term, while planning continues for medium and long term finishing treatments that will mitigate graffiti in the future.

We thank residents for their patience during cleaning works.
